# Life

**L**ife is a battle where each one  
must seek and hold his own  
He who would rise above the clouds  
must scale the heights alone

**T**his is the rule of life today as it  
has ever been:  
The world bestows its smile on  
those who have the strength to win

# From

From what I feel at this farewell,  
That, wherever my steps may tend,  
And wherever my course shall end,

My soul will cast the longing  
view the longing look alone on you

# Thus

**T**hus far while the sun sinks down to  
rest

Far in the regions of the west,  
Though to the vale no parting beam be  
given, not one memorial gleam

**L**ingering light we fondly throw  
On the hills where first we rose

## *On Teaching*

It is customary for adults to forget how hard and dull and long school is. The learning by memory all the basic things one must know is the most incredible and unending effort. Learning to read is probably the most difficult and revolutionary thing that happens to the human brain and if you don't believe that, watch an illiterate adult try to do it. School is not easy and it is not for the most part very much fun, but then, if you are very lucky, you may find a teacher. Three real teachers in a lifetime is the very best of luck. I have come to believe that a great teacher is a great artist and that there are as few as there are any other great artists. Teaching might even be the greatest of the arts since the medium is the human mind and spirit.

My three had these things in common. They all loved what they were doing. They did not tell—they catalyzed a burning desire to know. Under their influence, the horizons sprung wide and fear went away and the unknown became knowable. But most important of all, the truth, that dangerous stuff, became beautiful and very precious.

DR. CHARLES W. LAMONTAGNE — Superintendent

To the Graduates of the Class of 1979:

The Class of 1979 rings out the decade of the "Soaring Seventies". When a decade ends somehow the feeling that the decade gone is not to be lamented, but rather the new time ahead is to be filled with hope. Such may be the destiny for the Class of 1979..

In today's world there are many avenues beckoning to the future; an important one is learning. Surely, you will continue to learn and to discover new ways to solve old and new problems of daily life. Learning and a growing intellect are life long endeavors beginning at infancy. Fyodor Dostoyevsky, in his book, The Brothers Karamazov, said of learning:

"People always talk to you a great deal about your education, but some good sacred memory, preserved from childhood, is perhaps the best education....for that one memory may keep us from great evil or bring us to great heights....Let us be, first and above all, kind, then honest, and then let us never forget each other."

I am confident you have preserved that good sacred memory to stand you in good stead when you have to make that right decision.

Congratulations and best of luck to each of you of the Class of "79".

# YEARBOOK MESSAGE

To Members of the Class of 1979:

It is one of the traditions at graduation time for public speakers to extend advice, as elders, to those who are about to embark on careers or further education. And it is one of the privileges of those about to graduate to forget the admonitions so easily given.

On the eve of graduation in June, 1979, it is a time to develop plans for your future, for this class, as adults, will have significant impact in the twenty-first century, now only slightly more than two decades away.

There has been a characteristic of this class, however, that deserves commendation; it has been its social concern for its fellow humans as expressed in its activities and career aims.

It is this recognition that the future of each is inextricably interwoven with the future of mankind. For as was written long ago by the great metaphysical poet John Donne:

"No man is an Island, entire of itself; everyman is a piece of the Continent, a part of the main... I am involved in Mankind. And therefore never seek to know for whom the bells toll; it tolls for thee."

May your success in school be a happy portent to a future complete with good will toward man.

## WOBURN SCHOOL COMMITTEE

## DEDICATION

In our years at Woburn High School, we, the class of 1979, have been associated with many fine staff members. While we have gathered knowledge and experience from all of these people, there is one person who has contributed more to our class than anyone else.

With a pleasant, friendly manner and a smile, this teacher has encouraged and helped us to reach for success in all our endeavors, both in and out of school. He has shown us through his teaching, and by everyday example, how to achieve this success. His guidance and leadership has carried over into sports and extra-curricular activities, where he has lent his enthusiastic support many times. In addition, his classroom has been an enjoyable place to spend time at Woburn High.

For the many hours he has given us, for his belief in us, and for all his help, he will be remembered with respect and gratitude. In tribute, and with thanks, we dedicate the 1979 INNI-TOU to

Thomas J. Treacy

The happiest people seem to be those who have no particular cause for being happy except that they are so.

# AND WHAT DO WE REMEMBER?

We looked back and remembered the happy times, feeling the rewards of hard work and dedication. At other times, we felt all alone, isolated in the midst of a crowd. Our existence was one of constant new beginnings and continuous endings that filled our lives and our memories. It was our year, molded by the vast and diverse character of who we were and had become.

You're so bizarre  
You're like an island  
everyone can see  
happy and free  
you're so bizarre  
you really are
